Our Extensive Product Range

We offer a comprehensive range of diesel engine spare parts, carefully selected to ensure durability, performance, and reliability. From engine components to filters, pumps, and more, our product catalog covers a wide variety of popular diesel engines.

Quality Assurance

Quality is at the core of everything we do. We work closely with reputable manufacturers to source genuine and OEM-approved spare parts. Each product undergoes rigorous testing and inspection to meet industry standards, ensuring top-notch performance.

Expert Guidance and Support

Our experienced team of professionals is always ready to assist you. Whether you need guidance on selecting the right spare part or technical support, we're here to provide timely and knowledgeable assistance.

" Supply Marine Engine Spares & Consumables with Catalogues "

Our Extensive Product Range

At APP Engineering & Supplies, we understand the critical role that technical consumables play in the smooth operation of marine engines. That's why we offer an extensive product catalog, including but not limited to:

- **Engine Lubricants and Oils:** Keep your marine engines well-lubricated and protected with our premium-grade oils and lubricants.
- **Filters:** Ensure clean fuel and air intake for optimal engine performance with our high-quality filters.
- **Engine Coolants and Antifreeze:** Protect your engines from overheating and corrosion with our top-grade coolants and antifreeze solutions.
- **Gaskets and Seals:** Prevent leaks and ensure airtight sealing with our reliable gaskets and seals.
- **Anodes:** Safeguard your marine engines from corrosion with our sacrificial anodes.
- **Maintenance Kits:** Simplify maintenance routines with our convenient and comprehensive maintenance kits.

" We Deliver Generator Spares with catalogue"

At APP Engineering & Supplies, we understand the critical role that generators play in the smooth operation of ships. That's why we offer an extensive selection of generator spare parts to keep your marine generators running at peak performance.

Our product catalog includes, but is not limited to:

- **Generator Filters:** Ensure clean fuel and oil for optimal generator efficiency and longevity.
- **Engine Components:** Find genuine and OEM-approved components to maintain and repair your generators.
- **Electrical Parts:** Source reliable electrical components to ensure seamless generator operation.
- **Cooling System Components:** Keep your generators cool with top-grade cooling system parts.
- **Starters and Alternators:** Find high-quality starters and alternators for easy and reliable generator ignition.
- **Maintenance Kits:** Simplify maintenance routines with our comprehensive generator maintenance kits.

Hydraulic Works, Machining Works, and Motor Rewinding

• Hydraulic Works

service encompasses a wide range of solutions, including the installation, repair, and maintenance of hydraulic systems. From hydraulic equipment repair to hydraulic cylinder rebuilding, our skilled technicians are equipped to handle all your hydraulic needs with precision and expertise.

• Machining Works

At APP Engineering, we provide top-notch machining services to meet the unique requirements of the marine industry. Our machining services cover precision machining, fabrication, welding, and more. We use advanced machinery and tools to deliver high-quality results for your critical marine components.

• Motor Rewinding

Motor rewinding is a vital aspect of ensuring the reliable performance of electrical systems on marine vessels. Our team of experienced electricians specializes in motor rewinding services, offering quick turnaround times and adherence to strict quality standards.

" Servicing of Electrical and Electronic Instrumentation for Oil and Gas Vessels"

● Electrical Services

Our electrical services encompass a wide range of solutions for Oil and Gas Vessels. From electrical equipment installation and maintenance to troubleshooting and repairs, our team of skilled electricians is equipped to handle all your electrical needs with the utmost professionalism.

● Electronic Instrumentation Services

At APP Engineering, we specialize in Electronic Instrumentation Services, catering specifically to the complex systems onboard Oil and Gas Vessels. Our expertise includes the calibration, testing, and repair of electronic instruments and control systems critical to vessel operations.

● Oil and Gas Industry Compliance

We understand the stringent standards and regulations governing the Oil and Gas industry. Our services are designed to ensure compliance with industry requirements, allowing you to operate with confidence and peace of mind.

Engineering And Supplies Pte Ltd

• Steel and pipe Fabrication

At APP Engineering, we excel in steel and pipe fabrication, catering to a diverse range of marine applications. From structural steel components to custom-made pipes and fittings, our skilled fabricators ensure precise and reliable fabrication for your marine projects.

• Hydro Blasting

Our hydroblasting service utilizes high-pressure water jets to efficiently clean surfaces, removing corrosion, coatings, and other contaminants. Hydro Blasting effectively prepares surfaces for coating applications, ensuring optimal adhesion and prolonging the life of your marine structures.

• Coating

We offer a comprehensive coating service to protect your marine assets from the harsh marine environment. Our coating experts apply high-quality marine coatings, tailored to your specific requirements, to safeguard against corrosion, abrasion, and UV damage.

Servicing and Repairs of Centrifugal Pumps, Rotary Pumps, Piston Pumps, and Reciprocating Pumps

APP

**Engineering
AND SUPPLIES PTE LTD**

● Pump Service and Repairs

At APP Engineering, we offer comprehensive pump service and repair solutions for various pump types commonly used in the marine industry. From routine maintenance to complex repairs, our technicians are equipped to handle all your pump needs with precision and expertise.

● Centrifugal Pumps

Our team specializes in servicing and repairing centrifugal pumps, which are essential for various applications on marine vessels. We ensure that your centrifugal pumps operate optimally, delivering the required flow and pressure for your onboard systems.

● Rotary Pumps

Rotary pumps play a crucial role in marine operations. Our experts are well-versed in the intricacies of rotary pumps and can provide professional service and repair to ensure their smooth and reliable operation.

● Piston Pumps

Piston pumps are critical for several marine processes. Our technicians have the knowledge and experience to service and repair piston pumps, optimizing their performance and extending their lifespan.

● Reciprocating Pumps

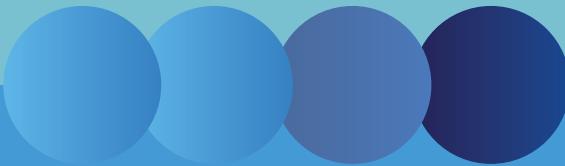

Reciprocating pumps are vital components in many marine systems. Our specialized services for reciprocating pumps help maintain their efficiency and minimize downtime during critical operations.

"Ship Chandler Services (Agent)"

Ship Chandling

At APP Engineering, we offer comprehensive Ship Chandler support, providing a wide range of provisions, consumables, and essential supplies for your vessels. Whether you require fresh provisions, technical supplies, or spare parts, our team is ready to assist.

Efficient Procurement

We understand the importance of timely procurement in the marine industry. Our well-established network and efficient logistics enable us to source and deliver the required provisions and supplies promptly, minimizing downtime for your vessels.

Customized Solutions

We recognize that each vessel has unique requirements. Our Ship Chandlers Agent services are tailored to meet your specific needs, ensuring that you receive personalized and cost-effective solutions for provisioning and supply management.

Engineering And Supplies Pte Ltd

● Ship Chandelling Support

During Dry Docking (DDX), we offer comprehensive ship chandling support to meet the provisioning needs of your vessels. From supplying fresh provisions and essential consumables to managing inventory and logistics, our team ensures that your crew's needs are met throughout the dry-docking process.

● Quality Provisions

We understand the importance of providing quality provisions during dry docking to sustain your crew's well-being and efficiency. Our provisions are sourced from reputable suppliers and carefully managed to ensure freshness and compliance with industry standards.

● Efficient Logistics

With a well-established logistics network, we ensure timely delivery of provisions and essential supplies during dry docking. Our efficient coordination minimizes downtime, allowing your vessels to resume operations promptly.

● Compliance and Safety

At APP Engineering, we prioritize compliance with industry regulations and safety standards. Our Ship Chandelling Support services are conducted with the utmost care, ensuring the safety of your crew and the vessel.□
